CONTENTS OF VOLUME 247

No. 1 *April* 1975

PAGE

Spontaneous and synaptic excitation of paramedian reticular neurones in the decerebrate cat. By A. W. DUGGAN and C. J. A. GAME 1

The sensitivity of paramedian reticular neurones to acetylcholine. By A. W. DUGGAN and C. J. A. GAME 25

The inulin space, sodium concentrations, and weight changes in rat renal medullary slices incubated in iso-osmolal media, and their modification during anoxia and hypothermia. By R. O. LAW. . 37

Volume adjustment by renal medullary cells in hypo- and hyperosmolal solutions containing permeant and impermeant solutes. By R. O. LAW 55

The relationship of adenosine triphosphatase activity to tension and power output of insect flight muscle. By JUDITH PYBUS and R. T. TREGEAR 71

Sodium fluxes in single amphibian oocytes: further studies and a new model. By D. A. T. DICK and D. J. FRY 91

The spinal course and distribution of fore and hind limb muscle afferent projections to the superior colliculus of the cat. By V. C. ABRAHAMS and P. K. ROSE 117

An investigation into the site of termination of static gamma fibres within muscle spindles of the cat peroneus longus muscle. By M. C. BROWN and R. G. BUTLER 131

On the association between transmitter secretion and the release of adenine nucleotides from mammalian motor nerve terminals. By EUGENE M. SILINSKY 145

The effects of prolonged repetitive stimulation in hemicholinium on the frog neuromuscular junction. By B. CECCARELLI and W. P. HURLBUT 163

Effects of adapting lights on the time course of the receptor potential of the anuran retinal rod. By J. A. COLES and S. YAMANE 189

A note on the mechanism by which inhibitors of the sodium pump accelerate spontaneous release of transmitter from motor nerve terminals. By P. F. BAKER and A. C. CRAWFORD . . 209

No. 2 *May* 1975

PAGE

The distribution time of intravenously injected raffinose and inulin in intact animals and the effect thereon on sex and infusion of oxytocin. By MARY PICKFORD 227

The detection of gratings by independent activation of line detectors. By P. E. KING-SMITH and J. J. KULIKOWSKI . . 237

Insulin-stimulated entry of glucose into muscle *in vivo* as a major factor in the regulation of blood glucose. By P. M. DANIEL, E. R. LOVE and O. E. PRATT 273

Effects of nerve growth factors from mouse salivary glands and snake venom on the sympathetic ganglia of neonatal and developing mice. By BARBARA E. C. BANKS, KATHERINE A. CHARLWOOD, D. CAIRD EDWARDS, CHARLES A. VERNON and STEPHEN J. WALTER 289

Multiple interneuronal afferents to the giant cells in *Aplysia*. By T. SHIMAHARA and L. TAUC 299

Heterosynaptic facilitation in the giant cell of *Aplysia*. By T. SHIMAHARA and L. TAUC 321

The possible role of cyclic AMP in the neurotrophic control of skeletal muscle. By RICHARD C. CARLSEN 343

Intracellular recordings of rod responses during dark-adaptation. By SANDRA REYNOLDS GRABOWSKI and WILLIAM L. PAK . . 363

Acetylcholine responses on clonal myogenic cells *in vitro*. By J. H. STEINBACH 393

Ionic mechanism of the efferent olivo-cochlear inhibition studied by cochlear perfusion in the cat. By JOHN E. DESMEDT and DONALD ROBERTSON 407

The effect of calcium ions on the binomial statistic parameters which control acetylcholine release at synapses in striated muscle. By M. R. BENNETT, T. FLORIN and R. HALL 429

The effects of maternal hypercapnia on foetal oxygenation and uterine blood flow in the pig. By R. HANKA, THE LATE L. LAWN, IVOR H. MILLS, D. C. PRIOR and PATRICIA M. TWEEDALE . . 447

Pancreatic acinar cells: effect of acetylcholine, pancreozymin, gastrin and secretin on membrane potential and resistance *in vivo* and *in vitro*. By O. H. PETERSEN and N. UEDA 461

PAGE

Responses of inner and outer muscle of the sheep carotid artery to injury. By J. M. GRAHAM and W. R. KEATINGE 473

Tetrodotoxin binding to normal and depolarized frog muscle and the conductance of a single sodium channel. By W. ALMERS and S. R. LEVINSON 483

The ionic dependence of action potentials induced by colchicine in an insect motoneurone cell body. By R. M. PITMAN 511

No. 3 *May* 1975

The effects of temperature and 2,4-dinitrophenol on transmembrane potentials of submandibular acinar cells. By KATE E. CREED and I. R. MCDONALD 521

Salt-induced changes in sodium transport across the skin of the euryhaline toad, *Bufo viridis*. By U. KATZ 537

The control of retinal ganglion cell discharge by receptive field surrounds. By CHRISTINA ENROTH-CUGELL and P. LENNIE . . 551

Surround contribution to light adaptation in cat retinal ganglion cells. By CHRISTINA ENROTH-CUGELL, P. LENNIE and R. M. SHAPLEY 579

Membrane potentials in pinched-off presynaptic nerve terminals monitored with a fluorescent probe: evidence that synaptosomes have potassium diffusion potentials. By M. P. BLAUSTEIN and J. M. GOLDRING 589

Effects of potassium, veratridine and scorpion venom on calcium accumulation and transmitter release by nerve terminals *in vitro*. By M. P. BLAUSTEIN 617

The influence of sodium on calcium fluxes in pinched-off nerve terminals *in vitro*. By M. P. BLAUSTEIN and CAROL JEAN OBORN . 657

Contrast sensitivity in humans with abnormal visual experience. By R. D. FREEMAN and L. N. THIBOS 687

Visual evoked responses in humans with abnormal visual experience. By R. D. FREEMAN and L. N. THIBOS 711

The interaction between foreign and original motor nerves innervating the soleus muscle of rats. By ERIC FRANK, JAN K. S. JANSEN, TERJE LØMO and ROLF H. WESTGAARD 725

PAGE

Corticofugal effects from sensorimotor area I and somatosensory area II on neurones of the pontine nuclei in the cat. By D. RÜEGG and M. WIESENDANGER 745

Uptake of orthophosphate by rabbit vagus nerve fibres. By BEATRICE ANNER, J. FERRERO, P. JIROUNEK and R. W. STRAUB . 759

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

17–18 *January* 1975

DEMONSTRATIONS

PAGE

Eccles, R. & Maynard, R. L. Studies on the nasal cycle in the immobilized pig . 1*P*

Brindley, G. S. A method for making and insulating many electrical connexions in an implant at the time of implantation or during a subsequent surgical procedure 2*P*

Wilson, H. & Yates. M. S. Crossed sympathetic innervation of the cat nasal vasculature 4*P*

Forsling, Mary L., Khokhar, A. M., Ramage, Christine M. & Slater, J. D. H. Radioimmunoassay of arginine vasopressin in urine (T) 5*P*

Campbell, F. W., Shute, C. C. D. & Tapp, R. L. Rapid measurement of mean corpuscular diameter 6*P*

Kady, N. N. & Nashat, F. S. The effects of raising the intrarenal pressure on the blood flow to the innervated and denervated kidneys of anaesthetized dogs . 8*P*

Devonshire, R. E., Nashat, F. S. & Tappiń, J. W. Experiments to demonstrate the relationship between ^{133}Xenon clearance and renal blood flow . . . 9*P*

Albano, J. D. M., Brown, B. L., Gould, R. P., Jack, P. M. B., Joseph, T. & Nathanielsz, P. W. The development of ACTH-sensitive adenylate cyclase activity in the foetal rabbit adrenal (T) 11*P*

Clothier, M. G., Green, J. H., Hardcastle, J., Hardcastle, P. T. & Sanford, P. A. Afferent nerve discharge from rat isolated small intestine *in vitro* . . . 11*P*

Gould, R. P., Tait, J. F. & Tait, S. A. S. Separation and function of dispersed adrenal cells by sedimentation under conditions of unit gravity . . . 12*P*

Powell, T. & Twist, V. W. Respiratory activity of isolated cells from adult rat heart 14*P*

Neil, E. & Palmer, J. F. Effects of spontaneous respiration on the latency of reflex cardiac chronotropic responses to baroreceptor stimulation 16*P*

Al-Tikriti, M. H. H. & Silver, P. H. S. Choroid fissure in transplanted primary optic vesicles in *Gallus domesticus* 17*P*

Grant, B. J. B. & Semple, S. J. G. Method for changing the amplitude of the respiratory oscillations in arterial pH with or without change in mean pH . 18*P*

Green, J. H. Heart sounds (T) 19*P*

Hendy, G. N., O'Riordan, J. L. H., Preece, N. A. & Tomlinson, S. Resistance to the renal action of parathyroid hormone in man (T) 19*P*

COMMUNICATIONS

Sandover, J. & Soames, R. W. Head movement during low-frequency vibration . 19*P*

Trott, Judy R. Reflex responses of fusimotor neurones during muscle vibration . 20*P*

SUBJECT INDEX

Acetylcholine, – responses on clonal myogenic cells *in vitro* (rat), **247**, 393

Acetylcholine release, on the association between transmitter secretion and the release of adenine nucleotides from mammalian motor nerve terminals (rat), **247**, 145

the effect of calcium ions on the binomial statistic parameters which control – at synapses in striated muscle (rat), **247**, 429

Acetylcholine sensitivity, the sensitivity of paramedian reticular neurones to acetylcholine (cat), **247**, 25

Action potential, the ionic dependence of – induced by colchicine in an insect motoneurone cell body (*Periplaneta americana*) **247**, 511

Adenosine triphosphatase, the relationship of – activity to tension and power output of insect flight muscle (*Lethocerus cordofanus*), **247**, 71

on the association between transmitter secretion and the release of adenine nucleotides from mammalian motor nerve terminals (rat), **247**, 145

uptake of orthophosphate by rabbit vagus nerve fibres, **247**, 759

Adrenal cells, separation and function of dispersed adrenal cells by sedimentation under conditions of unit gravity (rat), **247**, 12*P*

Anal sphincter, neural control of the internal anal sphincter of cats after chemical sympathectomy with 6-hydroxydopamine, **247**, 25*P*

Antidiuretic hormone, effect of changes in hypothalamic temperature on – secretion in pigs, **247**, 49*P*

Aplysia neurones, multiple interneuronal afferents to the giant cells in *Aplysia*, **247**, 299

β-cells, electrogenetic sodium pump in – of islets of Langerhans (mouse), **247**, 56*P*

Blood coagulation, a physiological adaptation of – in fish to the salinity of the external environment in fish, **247**, 32*P*

Blood glucose, insulin-stimulated entry of glucose into muscle *in vivo* as a major factor in the regulation of – (rat), **274**, 273

Bradykinin, the responses of visceral afferent nerves to – (cat), **247**, 53*P*

Calcium fluxes, the influence of sodium on – in pinched-off nerve terminals *in vitro* (rat), **247**, 657

Calcium ions, the effect of – on the binomial statistic parameters which control acetylcholine release at synapses in striated muscle (rat), **247**, 429

Calcium uptake, effects of potassium, veratridine and scorpion venom on calcium accumulation and transmitter release by nerve terminals *in vitro* (rat), **247**, 617

Capillary permeability, the distribution time of intravenously injected raffinose and inulin in intact animals and the effect thereon of sex and infusion of oxytocin (dogs, rats), **247**, 227

Cardiac glycoside, a note on the mechanism by which inhibitors of the sodium pump accelerate spontaneous release of transmitter from motor nerve terminals (frog), **247**, 209

Cardiac muscle, mechanically induced oscillations in heart muscle preparations equilibrated with strontium (cat), **247**, 40*P*

Cardiovascular reflexes, effects of spontaneous respiration on the latency of reflex cardiac chronotropic responses to baroreceptor stimulation (dog), **247**, 16*P*

Cardiovascular reflex, influence of combined baro- and chemoreceptor stimulation upon sympathetic activity **247**, 28*P*

Cell volume, volume adjustment by renal medullary cells in hypo- and hyperosmolal solutions containing permeant and impermeant solutes (rat), **247**, 55

Cerebellum, corticofugal effects from sensorimotor area I and somatosensory area II on neurones of the pontine nuclei in the cat, **247**, 745

Chemoreceptor excitation, the influence of laryngeal afferent stimulation on cardiac vagal responses to carotid – (dog), **247**, 24*P*

Chemosensitivity, the influence of intracellular comopnents on the – of skeletal muscle (rat), **247**, 42*P*

Chloride, ionic mechanism of the efferent olivo-cochlear inhibition studied by cochlear perfusion in the cat, **247,** 407

Choroid fissure, – in transplanted primary optic vesicles in *Gallus domesticus*, **247,** 17*P*

Cochlear perfusion, ionic mechanism of the efferent olivo-cochlear inhibition studied by – in the cat, **247,** 407

Colchicine, the ionic dependence of action potentials induced by – in an insect motoneurone cell body (*Periplaneta americana*), **247,** 511

Cyclic AMP, – in cerebrospinal fluid during fever and antipyresis (cat), **247,** 29*P*

the possible role of – in the neurotrophic control of skeletal muscle (rat), **247,** 343

Dark adaptation, intracellular recordings of rod responses during – (*Ambystoma mexicanum*), **247,** 363

Dinitrophenol, the effects of temperature and 2,4-dinitrophenol on transmembrane potentials of submandibular acinar cells (cat, possum), **247,** 521

Endometrium, simultaneous inhibition and potentiation by progesterone of the action of oestradiol on the bioelectric parameters of rat –, **247,** 55*P*

Erythrocyte diameter, rapid measurement of mean corpuscular diameter, **247,** 6*P*

Feeding, responses to – in the conscious unweaned calf, **247,** 34*P*

Foetal oxygenation, the effects of maternal hypercapnia on – and uterine blood flow in the pig, **247,** 447

Frog skin, the effects of indomethacin and prostaglandin E_1 on cyclic AMP levels in –, **247,** 31*P*

Fusimotor neurones, reflex responses of – during muscle vibration (cat), **247,** 20*P*

Gastric secretion, studies on gastric acid secretion using an isolated whole mammalian stomach *in vitro* (rat), **247,** 35*P*

Gastrin, immunoreactive – variants in cat serum, **247,** 33*P*

Glomerular filtration rate, the relationship between – and renal plasma flow during saline infusion in the anaesthetized dog, **247,** 47*P*

Glutamate binding, – to synaptic membranes detection of post-synaptic receptor sites?, **247,** 44*P*

Head movement, – during low-frequency vibration, **247,** 19*P*

Heterosynaptic facilitation in the giant cell of *Aplysia*, **247,** 321

Hypercapnia, the effects of maternal – on foetal oxygenation and uterine blood flow in the pig, **247,** 447

Injury, responses of inner and outer muscle of the sheep carotid artery to –, **247,** 473

Insect flight muscle, the relationship of adenosine triphosphate activity to tension and power output of – (*Lèthocerus cordofanus*), **247,** 71

Insulin, insulin-stimulated entry of glucose into muscle *in vivo* as a major factor in the regulation of blood glucose (rat), **247,** 273

Interneurones, multiple interneuronal afferents to the giant cells in *Aplysia*, **247,** 299

Intestinal nerves, afferent nerve discharge from rat isolated small intestine *in vitro*, **247,** 11*P*

Inulin space, the –, solute concentrations, and weight changes in rat renal medullary slices incubated in iso-osmolal media, and their modification during anoxia and hypothermia, **247,** 37

Light adaptation, effects of adapting lights on the time course of the receptor potential of the anuran retinal rod (*Bufo marinus, Rana catesbiana*), **247,** 189

surround contribution to – in cat retinal ganglion cells, **247,** 579

Lung, the release of ^{35}S-labelled material and SRS–A from immunologically challenged guinea-pig lungs, **247,** 37*P*

Lung receptors, the acute effects of SO_2 on pulmonary mechanics, breathing patterns and pulmonary vagal afferent receptors in the rabbit, **247,** 23*P*

Membrane permeability, pancreatic acinar cells: effect of acetylcholine, pancreozymin, gastrin and secretin on membrane potential and resistance *in vivo* and *in vitro* (rat), **247,** 461

Membrane potential, – in pinched-off presynaptic nerve terminals monitored with a fluorescent probe: evidence that synaptosomes have potassium diffusion potentials (rat), **247,** 589

Motoneurone, the ionic dependence of action potentials induced by colchicine in an insect motoneurone cell body (*Periplaneta americana*), **247,** 511

Motor nerves, the interaction between foreign and original – innervating the soleus muscle of rats, **247,** 725

Mucus, the effect of the autonomic nervous system and related drugs upon tracheal – secretion (cat) **247,** 27*P*

Muscle afferents, the spinal course and distribution of fore and hind limb – projections to the superior colliculus of the cat, **247,** 117

Muscle spindles, an investigation into the site of termination of static gamma fibres within muscle spindles of the cat peroneus longus muscle, **247,** 130

Myocyte metabolism, respiratory activity of isolated cells from adult rat heart, **247,** 14*P*

Nasal cycle, studies on the – in the immobilized pig, **247,** 1*P*

Nasal vasculature, crossed sympathetic innervation of the cat –, **247,** 4*P*

Nerve growth, effects of – factors from mouse salivary glands and snake venom on the sympathetic ganglia of neonatal and developing mice, **247,** 289

Nerve terminals, on the association between transmitter secretion and the release of adenine nucleotides from mammalian –, (rat), **247,** 145

Neurological prostheses, a method for making and insulating many electrical connexions in an implant at the time of implantation or during a subsequent surgical procedure, **247,** 2*P*

Neuromuscular junction, the effects of prolonged repetitive stimulation in hemicholineum on the frog –, **247,** 163

Neuronal firing pattern, spontaneous and synaptic excitation of paramedian reticular neurones in the decerebrate cat, **247,** 1

Neurotrophic control, the possible role of cyclic AMP in the – of skeletal muscle (rat), **247,** 343

Oesophagus, chemosensitive vagal endings in the – of cat, **247,** 52*P*

Olivo-cochlear inhibition, ionic mechanism of the efferent – studied by cochlear perfusion in the cat, **247,** 407

Oocytes, sodium fluxes in single amphibian –: further studies and a new model, **247,** 91

Orthophosphate, uptake of – by rabbit vagus nerve fibres, **247,** 759

Oxytocin, the distribution time of intravenously injected raffinose and inulin in intact animals and the effect thereon of sex and infusion of – (dog, rats), **247,** 227

Pancreatic acinar cells, –: effect of acetylcholine, pancreozymin, gastrin and secretin on membrane potential and resistance *in vivo* and *in vitro* (rat), **247,** 461

Paramedian reticular nucleus, spontaneous and synaptic excitation of paramedian reticular neurones in the decerebrate cat, **247,** 1

the sensitivity of paramedian reticular neurones to acetylcholine (cat), **247,** 25

Pontine nuclei, corticofugal effects from sensorimotor area I and somatosensory area II on neurones of the – in the cat, **247,** 745

Potassium, effects of –, veratridine and scorpion venom on calcium accumulation and transmitter release by nerve terminals *in vitro* (rat), **247,** 617

membrane potentials in pinched-off presynaptic nerve terminals monitored with a fluorescent probe: evidence that synaptosomes have – diffusion potentials (rat), **247,** 589

Presynaptic nerve, membrane potentials in pinched-off – terminals monitored with a fluorescent probe: evidence that synaptosomes have potassium diffusion potentials (rat) **247,** 589

Procaine, effects of amino acids on ventral root potentials of the – blocked amphibian spinal cord (toad), **247,** 43*P*

Receptive fields, the control of retinal ganglion cell discharge by receptive field surrounds (cat), **247,** 551

Renal blood flow, experiments to demonstrate the relationship between ^{133}Xenon clearance and –, dog, **247,** 9*P*

Renal medulla, the inulin space, solute concentrations, and weight changes in rat renal medullary slices incubated in iso-osmolal media, and their modification during anoxia and hypothermia (rat), **247,** 37

volume adjustment by renal medullary cells in hypo- and hyperosmolal solutions containing permeant and impermeant solutes (rat), **247,** 55

Renal nerves, the effects of raising the intrarenal pressure on the blood flow to the innervated and denervated kidneys of anaesthetized dogs, **247,** 8*P*

Renal plasma flow, the relationship between glomerular filtration rate and – during saline infusion in the anaesthetized dog, **247,** 47*P*

Renin, further evidence for physiological changes in the enzymic activity of –; effect of furosemide infusion in dogs, **247,** 51*P*

Respiration, method for changing the amplitude of the respiratory oscillations in arterial pH with or without change in mean pH (cat), **247,** 18*P*

Respiratory control, reflex control of expiratory airflow and duration (cat), **247,** 22*P*

Retina, intracellular recordings of rod responses during dark-adaptation (*Ambystoma mexicanum*), **247,** 363

Retinal ganglion cells, surround contribution to light adaptation in cat –, **247,** 579

the control of – discharge by receptive field surrounds (cat), **247,** 551

Rods, effects of adapting lights on the time course of the receptor potential of the anuran retinal rod (*Bufo marinus, Rana catesbiana*), **247,** 189

intracellular recordings of rod responses during dark-adaptation (*Ambystoma mexicanum*, **247,** 363

Salivary gland secretion, the effects of temperature and 2,4-dinitrophenol on transmembrane potentials of submandibular acinar cells (cat, possum), **247,** 521

Secretion, electrogenic sodium pump in β-cells of islets of Langerhans (mouse), **247,** 56*P*

Serotonin, heterosynaptic facilitation in the giant cell of *Aplysia*, **247,** 321

Sex differences, the distribution time of intravenously injected raffinose and inulin in intact animals and the effect thereon of sex and infusion of oxytocin (dog, rats), **247,** 227

Skeletal muscle, acetylcholine responses on clonal myogenic cells *in vitro* (rat), **247,** 393

insulin-stimulated entry of glucose into muscle *in vivo* as a major factor in the regulation of blood glucose (rat), **247,** 273

the influence of intracellular components on the chemosensitivity of – (rat), **247,** 42*P*

the interaction between foreign and original motor nerves innervating the soleus muscle of rats, **247,** 725

tetrodoxin binding to normal and depolarized frog muscle and the conductance of a single sodium channel, **247,** 483

the possible role of cyclic AMP in the neurotrophic control of – (rat), **247,** 343

Skin, salt-induced changes in sodium transport across the – of the euryhaline toad, *Bufo viridis*, **247,** 537

Smooth muscle, responses of inner and outer muscle of the sheep carotid artery to injury, **247,** 473

Sodium concentration, the influence of sodium on calcium fluxes in pinched-off nerve terminals *in vitro* (rat), **247,** 657

Sodium conductance, tetrodotoxin binding to normal and depolarized frog muscle and the conductance of a single sodium channel, **247,** 483

Sodium efflux, sodium fluxes in single amphibian oocytes: further studies and a new model, **247,** 91

Sodium excretion, the effects of catecholamines and prostaglandins on blood flow through the isolated rat kidney following volume expansion, **247,** 58*P*

Sodium pump, a note on the mechanism by which inhibitors of the – accelerate spontaneous release of transmitter from motor nerve terminals (frog), **247,** 209

Sodium transport, salt-induced changes in – across the skin of the euryhaline toad *Bufo viridis*, **247,** 537

Somatosensory cortex, corticofugal effects from sensorimotor area I and somatosensory area II on neurones of the pontine nuclei in the cat, **247,** 745

Spinal cord, effects of amino acids on ventral root potentials of the procaine blocked amphibian – (toad), **247,** 43*P*

Static fusimotor fibres, an investigation into the site of termination of static gamma fibres within muscle spindles of the cat peroneus longus muscle, **247,** 130

Striated muscle, the effect of calcium ions on the binomial statistic parameters which control acetylcholine release at synapses in – (rat), **247,** 429

Sulphur dioxide, the acute effects of SO_2 on pulmonary mechanics, breathing patterns and pulmonary vagal afferent receptors in the rabbit, **247,** 23*P*

Superior colliculus, the spinal course and distribution of fore and hind limb muscle afferent projections to the – of the cat, **247**, 117

Sympathetic ganglia, effects of nerve growth factors from mouse, salivary glands and snake venom on the – of neonatal and developing mice, **247**, 289

Sympathetic nerves, release of dopamine β-hydroxylase during sympathetic nervous activity in tetraplegic man, **247**, 38*P*

Synapse, heterosynaptic facilitation in the giant cell of *Aplysia*, **247**, 321

Synaptic vesicles, the effects of prolonged repetitive stimulation in hemicholinium on the frog neuromuscular junction, **247**, 163

Synaptosomes, effects of potassium, veratridine and scorpion venom on calcium accumulation and transmitter release by nerve terminals *in vitro* (rat), **247**, 617

the influence of sodium on calcium fluxes in pinched-off nerve terminals *in vitro* (rat), **247**, 657

Temperature, the effects of – and 2,4-dinitrophenol on transmembrane potentials of submandibular acinar cells (cat, possum), **247**, 521

Tetrodotoxin, – binding to normal and depolarized frog muscle and the conductance of a single sodium channel, **247**, 483

Thermoregulation, cyclic adenosine-3′, 5′-monophosphate in cerebrospinal fluid during fever and antipyresis (cat), **247**, 29*P*

effect of changes in hypothalamic temperature on ADH secretion in pigs, **247**, 49*P*

Transmitter release, a note on the mechanism by which inhibitors of the sodium pump accelerate spontaneous release of transmitter from motor nerve terminals (frog), **247**, 209

effects of potassium, veratridine and scorpion venom on calcium accumulation and – by nerve terminals *in vitro* (rat), **247**, 617

Uterine blood flow, the effects of maternal hypercapnia on foetal oxygenation and – in the pig, **247**, 447

Vagus nerve, uptake of orthophosphate by rabbit – fibres **247**, 759

Vasopressin, the effects of noradrenaline on the – concentration of plasma and on urine excretion in the dog, **247**, 46*P*

Vision, contrast sensitivity in humans with abnormal visual experience, **247**, 687

the detection of gratings by independent activation of line detectors (man), **247**, 237

visual evoked responses in humans with abnormal visual experience, **247**, 711

CONTENTS OF VOLUME 248

No. 1 *May* 1975

PAGE

The turnover of phosphorus compounds in crab muscle fibres. By P. C. Caldwell and G. E. Walster 1

Plasma catecholamines in foetal and adult sheep. By C. T. Jones and R. O. Robinson 15

Polyphasic synaptic potentials in the ganglion of the mollusc, *Navanax*. By Herbert Levitan and Ladislav Tauc . . . 35

Potassium and sodium ion current noise in the membrane of the squid giant axon. By F. Conti, L. J. de Felice and E. Wanke . 45

Dynamic properties of fast and slow skeletal muscles in the cat and rat following cross-reinnervation. By A. R. Luff . . . 83

Properties of surface and junctional membranes of embryonic cells isolated from blastula stages of *Xenopus laevis*. By Christine Slack and Anne E. Warner 97

The action of ether and methoxyflurane on synaptic transmission in isolated preparations of the mammalian cortex. By C. D. Richards, W. J. Russell and J. S. Smaje 121

Absorption of two proline containing peptides by rat small intestine *in vivo*. By Annette E. Lane, D. B. S. Silk and M. L. Clark 143

Physiological identification of a morphological class of cat retinal ganglion cells. By B. G. Cleland, W. R. Levick and H. Wassle . 151

Intracellular potentials in cells of the seminiferous tubules of rats. By A. W. Cuthbert and P. Y. D. Wong 173

The control of adaptive hypertrophy in the salt glands of geese and ducks. By Ann Hanwell and M. Peaker 193

Structural, mechanical and myothermic properties of rabbit rectococcygeus muscle. By D. F. Davey, C. L. Gibbs and H. C. McKirdy 207

Electrophysiological properties of spinal motoneurones on normal and dystrophic mice. By P. Huizar, M. Kuno and Y. Miyata . 231

No. 2 *June* 1975

PAGE

Sensitivity of central chemoreceptors controlling blood glucose and body temperature during glucose deprivation. By ANNA FIORENTINI and E. E. MULLER 247

Preparation of partial characterization of hepatic regenerative stimulator substance (SS) from rat liver. By DOUGLAS R. LABRECQUE and LEROY A. PESCH 273

On the role of mitochondria in transmitter in release from motor nerve terminals. By A. ALNAES and R. RAHAMIMOFF 285

The bioelectric parameters of the vagina during the oestrous cycle of the rat. By D. FRANCES EDWARDS and R. J. LEVIN . . 307

Properties of centre-hyperpolarizing, red-sensitive bipolar cells in the turtle retina. By AMREI RICHTER and E. J. SIMON . . . 317

Sugar absorption by foetal and neonatal rat intestine *in vitro*. By D. R. BAMFORD and P. A. INGHAM. 335

Thermal receptors in the scrotum of the rat. By R. F. HELLON, H. HENSEL and K. SCHÄFER 349

Convergence in a thermal afferent pathway in the rat. By R. F. HELLON and D. MITCHELL 359

The effect of duodenal infusion on the electromyogram of gastric muscle during activation and inhibition of gastric emptying. By F. R. BELL and MARIE-LAURE GRIVEL 377

Rhodopsin flash photolysis in man. By E. N. PUGH, JR. . . . 393

Rushton's paradox: rod dark adaptation after flash photolysis. By E. N. PUGH, JR. 413

Light path and photon capture in turtle photoreceptors. By D. A. BAYLOR and R. FETTIPLACE 433

Sensorimotor cortical representation in the rat and the role of the cortex in the production of sensory myoclonic jerks. By A. ANGEL and R. N. LEMON 465

Effects of afferent volleys from the limbs on the discharge patterns of interpositus neurones in cats anaesthetized with α-chloralose. By D. M. ARMSTRONG, BARBARA COGDELL and R. J. HARVEY 489

Responses of tendon organs in a lizard. By J. E. GREGORY and U. PROSKE 519

No. 3. *June* 1975

PAGE

Muscle load and constriction of the rabbit ear artery. By R. N. SPEDEN 531

Spectral correlates of a quasi-stable depolarization in barnacle photoreceptor following red light. By H. MACK BROWN and M. CARTER CORNWALL 555

Ionic mechanism of a quasi-stable depolarization in barnacle photoreceptor following red light. By H. MACK BROWN and M. CARTER CORNWALL 479

Gastric antral and fundic pouch secretion in sheep. By L. M. MCLEAY and D. A. TITCHEN 595

The interactions of calcium with *Myxicola* giant axons and a description in terms of a simple surface charge model. By C. L. SCHAUF 613

The antipyretic effect of indomethacin. By WESLEY G. CLARK and H. RICK CUMBY 625

The effect of sympathetic nerve stimulation on acid secretion, regional blood flows and oxygen usage by stomachs of anaesthetized cats. By ERIC R. GRUND, J. DAVID REED and DAVID J. SANDERS 639

Contrast sensitivity of individual colour mechanisms of human vision. By C. R. CAVONIUS and O. ESTÉVEZ 649

Innate and environmental factors in the development of the kitten's visual cortex. By COLIN BLAKEMORE and RICHARD C. VAN SLUYTERS 663

The mechanical properties of oesophageal striated muscle in the cat and sheep. By K. FLOYD and J. F. B. MORRISON 717

Descending inhibitory influences exerted by the brain stem upon the activities of dorsal horn lamina V cells induced by intra-arterial injection of bradykinin into the limbs. By J. M. BESSON, G. GUILBAUD and D. LE BARS 725

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

21–22 *February* 1975

SUBJECT INDEX

Abomasum, gastric antral and fundic pouch secretion in sheep, **248**, 595
Absorption, – of two proline containing peptides by rat small intestine *in vivo*, **248**, 143
Adenosine triphosphate, the turnover of phosphorus compounds in crab muscle fibres, **248**, 1
fate of – in human plasma, **248**, 25*P*
Anaesthetics, the action of ether and methoxyflurane on synaptic transmission in isolated preparations of the mammalian cortex (guinea-pig), **248**, 121
Antipyresis, the antipyretic effect of indomethacin (cat), **248**, 625
Aortic valve, impedance change to differing heart rate and cardiac output across the acutely stenosed – (sheep), **248**, 33*P*
Artery, muscle load and constriction of the rabbit ear artery, **248**, 531
Audio visual aids, teaching with the Phillips Cassettoscope LCH 2020, **248**, 4*P*

Barnacle, spectral correlates of a quasi-stable depolarization in – photoreceptor following red light, **248**, 555
Blood flow, the effect of sympathetic nerve stimulation on acid secretion, regional – and oxygen usage by stomachs of anaesthetized cats, **248**, 639
Blood glucose, sensitivity of central chemoreceptors controlling – and body temperature during glucose deprivation (rat), **248**, 247
Bipolar cells, properties of centre-hyperpolarizing, red-sensitive – in the turtle retina, **248**, 317
Body temperature, sensitivity of central chemoreceptors controlling blood glucose and – during glucose deprivation (rat), **248**, 247
Botulinum toxin, suppression of botulinum toxin-induced axonal sprouting in skeletal muscle by implantation of an extra nerve (mouse), **248**, 1*P*
Bradykinin, descending inhibitory influences exerted by the brain stem upon the activities of the dorsal horn lamina V cells induced by intra-arterial injection of – into the limbs (cat), **248**, 725
Brain stem, descending inhibitory influences exerted by the brain stem upon the activities by dorsal horn lamina V cells induced by intra-arterial injection of bradykinin into the limbs (cat), **248**, 725

Calcium, the interactions of – with *Myxicola* giant axons and a description in terms of a simple surface charge model, **248**, 613
Carbonic anhydrase potentials, intracellular potentials in cells of the seminiferous tubules of rats, **248**, 173
Carotid body, a new theory for the receptor mechanism of the –, **248**, 22*P*
Catecholamines, plasma – in foetal and adult sheep, **248**, 15
Cerebral cortex, a short latency pathway from forearm nerves to area 4 of the baboon's –, **248**, 43*P*
Chemoreceptors, a new theory for the receptor mechanism of the carotid body, **248**, 22*P*
sensitivity of central – controlling blood glucose and body temperature during glucose deprivation (rat), **248**, 247
Chloralose, effects of afferent volleys from the limbs on the discharge patterns of interpositus neurones in cats anaesthetized with α-chloralose, **248**, 489
Colour, contrast sensitivity of individual – mechanisms of human vision, **248**, 649
Cones, light path and photon capture in turtle photoreceptors, **248**, 433
Cortical neurones, a statistical description of neuronal activity in the cerebral cortex of the unrestrained cat, **248**, 44*P*
Crab muscle, the turnover of phosphorus compounds in – fibres, **248**, 1
Cross-innervation, dynamic properties of fast and slow skeletal muscles in the cat and rat following –, **248**, 83
Cuneate nucleus, correlation between blockade of synaptic inhibition in the rat – and the facilitation of cortical evoked potentials, **248**, 42*P*

Dark adaptation, Rushton's paradox: rod – after flash photolysis, **248**, 413
Denervation, the effects of – on isometric contractions of rat skeletal muscle, **248**, 11*P*

Development, innate and environmental factors in the – of the kitten's visual cortex, **248,** 663
Dopaminergic cells, –, responses to olfactory input (rat), **248,** 47*P*
Dorsal horn, descending inhibitory influences exerted by the brain stem upon the activities of – lamina V cells induced by intra-arterial injection of bradykinin into the limbs (cat), **248,** 725
Duodenum, the effect of duodenal infusion on the electromyogram of gastric muscle during activation and inhibition of gastric emptying (calf), **248,** 377

Electrical noise, potassium and sodium ion current noise in the membrane of the squid giant axon, **248,** 45
Electromyogram, the effect of duodenal infusion on the – of gastric muscle during activation and inhibition of gastric emptying (calf), **248,** 377
Embryo membrane properties, properties of surface and junctional membranes of embryonic cells isolated from blastula stages of *Xenopus laevis*, **248,** 97

Fever, prostaglandin E levels in cerebral spinal fluid of rabbits and the effects of bacterial pyrogen and antipyretic drugs, **248,** 26*P*
– and brain prostaglandin release (rabbit), **248,** 27*P*
Flash photolysis, rhodopsin – in man, **248,** 393
Rushton's paradox: rod dark adaptation after –, **248,** 413
Foetal sheep, plasma catecholamines in foetal and adult sheep, **248,** 15

Gastric acid secretion, the effect of sympathetic nerve stimulation on acid secretion, regional blood flows and oxygen usage by stomachs of anaesthetized cats, **248,** 639
Gastric emptying, the effect of duodenal infusion on the electromyogram of gastric muscle during activation and inhibition of – (calf), **248,** 377
Gastric secretion, gastric antral and fundic pouch secretion in sheep, **248,** 595
Giant axon, potassium and sodium ion current noise in the membrane of the squid –, **248,** 45
the interactions of calcium with *Myxicola* – and a description in terms of a simple surface charge model, **248,** 613
Glass scintillator, calcium influx into single crustacean muscle fibres as measured with a – probe, **248,** 9*P*
Glycosides, dissociation of the inotropic effect of acetylstrophanthidin in myocardium and the increase of K^+ efflux (rabbit), **248,** 13*P*

Heat production, structural, mechanical and myothermic properties of rabbit rectococcygeous muscle, **248,** 207
Hypertrophy, the control of adaptive – in the salt glands of geese and ducks, **248,** 193
Hypoxia, plasma catecholamines in foetal and adult sheep, **248,** 15

Indomethacin, the antipyretic effect of – (cat), **248,** 625
Inhibition, the inhibitory effects of muscle spindle primary afferents investigated by the afferent triggered averaging method (cat), **248,** 20*P*
Intestinal absorption, sugar absorption by foetal and neonatal rat intestine *in vitro*, **248,** 335
Ionic currents, potassium and sodium ion current noise in the membrane of the squid giant axon, **248,** 45
Ionic mechanism – of a quasi-stable depolarization in barnacle photoreceptor following red light, **248,** 579

Limb reflex, sensorimotor cortical representation in the rat and the role of the cortex in the production of sensory myoclonic jerks (rat, rabbit, cat), **248,** 465
Lipids, structural changes in the parotid gland induced by lipid diets (rat), **248,** 30*P*
Liver, preparation and partial characterization of hepatic regenerative stimulator substance (SS) from rat –, **248,** 273

Mechanoreceptors, responses of tendon organs in a lizard, **248,** 519
Membrane depolarization, spectral correlates of a quasi-stable depolarization in barnacle photoreceptor following red light, **248,** 555
ionic mechanism of a quasi-stable depolarization in barnacle photoreceptor following red light, **248,** 579
Mitochondria, on the role of – in transmitter release from motor nerve terminals (frog), **248,** 285

Molluscan, neurones, polyphasic synaptic potentials in the ganglion of the mollusc (*Navanax*), **248**, 35
Monoamines, inactivation of phenylethylamine and 5-hydroxytryptamine in rat isolated lungs: evidence for monoamine oxidase A and B in lung (rat), **248**, 23*P*
Morphine analgesia, –, its main site of action?, **248**, 40*P*
Motor nerve terminals, on the role of mitochondria in transmitter release from – (frog), **248**, 285
Muscle, calcium influx into single crustacean – fibres as measured with a glass scintillator probe, **248**, 9*P*
Muscle fibres, the turnover of phosphorus compounds in crab –, **248**, 1
Muscle spindle afferents, the inhibitory effects of muscle spindle primary afferents investigated by the afferent triggered averaging method (cat), **248**, 20*P*
Muscular dystrophy, electrophysiological properties of spinal motoneurones of normal and dystrophic mice, **248**, 231
Myocardium, dissociation of the inotropic effect of acetylstrophanthidin in – and the increase of K^+ efflux (rabbit), **248**, 13*P*
Myoglobin, the oxygen affinity of horse and human myoglobins, **248**, 32*P*

Neonate, sugar absorption by foetal and neonatal rat intestine *in vitro*, **248**, 335
Neuromuscular junction, suppression of botulinum toxin-induced axonal sprouting in skeletal muscle by implantation of an extra nerve (mouse), **248**, 1*P*
Neuronal morphology, the morphology of *Aplysia* neurones, **248**, 16*P*
Neurones, effects of afferent volleys from the limbs, on the discharge patterns of interpositus – in cats anaesthetized with α-chloralose, **248**, 489
Neurotubules, systems connecting endoplasmic reticulum with axon and dendrites (squid), **248**, 17*P*
Nociceptive stimulation, a device for applying – by pressure, **248**, 5*P*

Oesophagus, the mechanical properties of oesophageal striated muscle in the cat and sheep, **248**, 717
Oestrous cycle, the biolectric parameters of the vagina during the – of the rat, **248**, 307
Olfactory cortex, the action of ether and methoxyflurane on synaptic transmission in isolated preparations of the mammalian cortex (guinea-pig), **248**, 121
Olfactory input, dopaminergic cells – responses to – (rat), **248**, 47*P*
Ovulation, evidence that iron does not induce – by excitation of neurones in the rostral hypothalamus (rat), **248**, 29*P*

Pain, descending inhibitory influences exerted by the brain stem upon the activities of dorsal horn lamina V cells induced by intra-arterial injection of bradykinin into the limbs (cat), **248**, 725
Peptides, absorption of two proline containing peptides by rat small intestine *in vivo*, **248**, 143
Photoreceptors, spectral correlates of a quasi-stable depolarization in barnacle – following red light, **248**, 555
ionic mechanism of a quasi-stable depolarization in barnacle – following red light, **248**, 579
Plasticity, – of intertectal connexions in adult *Xenopus*, **248**, 36*P*
Potassium fluxes, the transient effect of ATP on K movements in HeLa cells, **248**, 14*P*
Prostaglandins, prostaglandin E levels in cerebral spinal fluid of rabbits and the effects of bacterial pyrogen and antipyretic drugs, **248**, 26*P*
fever and brain – release (rabbit), **248**, 27*P*
Pulmonary circulation, inactivation of phenylethylamine and 5-hydroxytryptamine in rat isolated lungs: evidence for monamine oxidase A and B in lung (rat), **248**, 23*P*

Regeneration, preparation and partial characterization of hepatic regenerative stimulator substance (SS) from rat liver **248**, 273
Respiratory calculations, calculation of cardiorespiratory data using a small desk computer, **248**, 3*P*
Reticular formation, non-responsiveness of reticular neurones following their excitation by a sensory input (cat), **248**, 46*P*
Retina, properties of centre-hyperpolarizing red-sensitive bipolar cells in the turtle –, **248**, 317
Retinal ganglion cells, physiological identification of a morphological class of cat –, **248**, 151

Rhodopsin, – flash photolysis in man, **248,** 393
Rods, Rushton's paradox: rod dark adaptation after flash photolysis, **248,** 413

Salivary glands, structural changes in the parotid gland induced by lipid diets (rat), **248,** 30*P*
Salt glands, the control of adaptive hypertrophy in the – of geese and ducks, **248,** 193
Scrotum, thermal receptors in the – of the rat, **248,** 349
convergence in a thermal afferent pathway in the rat, **248,** 359
Sensorimotor cortex, sensorimotor cortical representation in the rat and the role of the cortex in the production of sensory myoclonic jerks, **248,** 465
Skeletal muscle, the effects of denervation on isometric contractions of rat, – **248,** 11*P*
dynamic properties of fast and slow – in the cat and rat following cross-innervation, **248,** 83
Small intestine, absorption of two proline containing peptides by rat – *in vivo*, **248,** 143
Smooth muscle, structural mechanical and myothermic properties of rabbit rectococcygeous muscle, **248,** 207
Spinal motoneurones, electrophysiological properties of – of normal and dystrophic mice, **248,** 231
Stiles-Crawford effect, light path and photon capture in turtle photoreceptors **248,** 433
Striated muscle, the mechanical properties of oesophageal – in the cat and sheep, **248,** 717
Sugar, – absorption by foetal and neonatal rat intestine *in vitro*, **248,** 335
Superior colliculi, the effect of visual stimuli on the turnover of 5-hydroxy tryptamine (5-HT) in the – (rabbit), **248,** 39*P*
Surface charge, the interactions of calcium with *Myxicola* giant axons and a description in terms of a simple – model, **248,** 613
Sympathetic nerves, the effect of sympathetic nerve stimulation and acid secretion, regional blood flow and oxygen usage by stomachs of anaesthetized cats, **248,** 639
Synaptic potentials, polyphasic – in the ganglion of the mollusc, *Navanax*, **248,** 35
Synaptic transmission, the action of ether and methoxyflurane on – in isolated preparations of the mammalian cortex (guinea-pig), **248,** 121

Tendon organs, responses of – in a lizard **248,** 519
Testes, intracellular potentials in cells of the seminiferous tubules of rats, **248,** 173
Thermal stimulator, a precision high-speed –, **248,** 7*P*
Thermoreceptors, thermal receptors in the scrotum of the rat, **248,** 349
Transmitter release, on the role of mitochondria in – from motor nerve terminals (frog), **248,** 285
Tris, the effect of – on the response of various isolated, mammalian preparations to nerve and drug stimulation, **248,** 12*P*
Tyrosine hydroxylase, delayed increase in – activity in rat superior cervical ganglion after electrical stimulation of the preganglionic nerve, **248,** 48*P*

Vagina, the bioelectric parameters of the – during the oestrous cycle of the rat, **248,** 307
Vasoconstriction, muscle load and constriction of the rabbit ear artery, **248,** 531
Vision, the detection of complex gratings by the human visual system, **248,** 37*P*
contrast sensitivity of individual colour mechanisms of human –, **248,** 649
Visual cortex, innate and environmental factors in the development of the kitten's visual cortex, **248,** 663
Visual stimuli, the effect of – on the turnover of 5-hydroxytryptamine (5-HT) in the superior colliculi (rabbit), **248,** 39*P*
Visual system, the synaptic organization of the diencephalic input to the amphibian tectum, **248,** 35*P*
plasticity of intertectal connexions in adult *Xenopus*, **248,** 36*P*

Wrist, jump effect at the – model using light or non-linear damping, **248,** 19*P*

CONTENTS OF VOLUME 249

No. 1 *July* 1975

PAGE

Intracellular pH and distribution of weak acids across cell membranes. A study of D- and L-lactate and of DMO in rat diaphragm. By ALBERT ROOS 1

Comparative study of the effects of propranolol and tetracaine on cation movements in resealed human cell red ghosts. By H. PORZIG 27

The interaction of adenosinetriphosphate and inorganic phosphate with the sodium pump in red cells. By R. P. GARAY and P. J. GARRAHAN 51

Rate of flow of digesta and electrical activity of the small intestine in dogs and sheep. By L. BUENO, J. FIORAMONTI and Y. RUCKEBUSCH 69

Depression in the excitability of relay cells of lateral geniculate nucleus following saccadic eye movements in the cat. By HIROHARU NODA 87

Transport of electrolytes across the helicoidal colon of the newborn pig. By P. J. BENTLEY and M. W. SMITH 103

The differential effect of cooling on responses of cerebellar cortex. By J. C. ECCLES, I. ROSÉN, P. SCHEID and HELENA TÁBOŘÍKOVÁ . 119

The effects of intra-ruminal loading with cold water on thermoregulatory behaviour in sheep. By B. A. BALDWIN . . . 139

Skeleto-fusimotor axons in hind-limb muscles of the cat. By FRANÇOISE EMONET-DÉNANAD, LÉNA JAMI and YVES LAPORTE . 153

Extracellular potassium changes in the spinal cord of the cat and relation to slow potentials, active transport and impulse transmission. By N. KŘÍŽ, EVA SYKOVÁ and L. VYKLICKÝ . . . 167

No. 2 *July* 1975

The amplitude and the time course of the end-plate current at various pH levels in the frog sartorius muscle. By MARIA SCUKA. With an Appendix by R. KARBA and C. MANGIAVACCHI . . 183

Temperature dependence of the circulation pattern in the upper extremities. By E. R. RAMAN and V. J. VANHUYSE . . . 197

PAGE

Potassium activation in *Helix aspersa* neurones under voltage clamp: a component mediated by calcium influx. By R. W. MEECH and N. B. STANDEN 211

Calcium and sodium ions as charge carriers in the action potential of an identified snail neurone. By N. B. STANDEN 241

Voltage-clamp studies of the calcium inward current in an identified snail neurone: comparison with the sodium inward current. By N. B. STANDEN. 253

The effect of procaine on the action of acetylcholine at the neuromuscular junction. By B. KATZ and R. MILEDI 269

The effect of temperature on desensitization kinetics at the postsynaptic membrane of the frog muscle fibre. By L. G. MAGAZANIK and F. VYSKOČIL 285

The development of functional innervation in the hind limb of the chick embryo. By LYNN LANDMESSER and DEBORAH G. MORRIS . 301

The movement of potassium ions during electrical activity, and the kinetics of the recovery process, in the non-myelinated fibres of the garfish olfactory nerve. By J. M. RITCHIE and R. W. STRAUB 327

The heat production associated with the passage of a single impulse in pike olfactory nerve fibres. By J. V. HOWARTH, R. D. KEYNES, J. M. RITCHIE and A. VON MURALT 349

Synaptic potentials recorded from neurones of the submucous plexus of guinea-pig small intestine. By G. D. S. HIRST and H. C. MCKIRDY 369

The relation between discrimination and sensitivity in the perception of motion in depth. By K. I. BEVERLEY and D. REGAN . 387

An analysis of the representation of the forelimb in the ventrobasal thalamic complex of the albino rat. By A. ANGEL and K. A. CLARKE 399

Is brain prostaglandin synthesis involved in responses to cold? By W. I. CRANSTON, R. F. HELLON and D. MITCHELL 425

No. 3 *July* 1975

Bronchial hysteresis in excised lungs. By J. M. B. HUGHES, HAZEL A. JONES and A. G. WILSON 435

The velocity tuning of single units in cat striate cortex. By J. ANTHONY MOVSHON 445

PAGE

Contractions induced by a calcium-triggered release of calcium from the sarcoplasmic reticulum of single skinned cardiac cells. By ALEXANDRE FABIATO and FRANÇOISE FABIATO 469

Effects of magnesium on contractile activation of skinned cardiac cells. By ALEXANDRE FABIATO and FRANÇOISE FABIATO . . 497

Pattern and flicker detection analysed by subthreshold summation. By P. E. KING-SMITH and J. J. KULIKOWSKI. 519

Effects of ionic concentration on sodium permeability properties of myelinated nerve fibres of *Xenopus laevis*. By T. BRISMAR and B. FRANKENHAEUSER 549

The response to stretch of human intercostal muscle spindles studied *in vitro*. By J. NEWSOM DAVIS 561

Atrial receptors and heart rate: the efferent pathway. By C. T. KAPPAGODA, R. J. LINDEN, EVELYN M. SCOTT and H. M. SNOW . 581

Transport of deuterium oxide across isolated rat small intestine. By R. J. BYWATER, R. B. FISHER and M. L. G. GARDNER . . 591

Prostaglandins endotoxin and lipid A on body temperature in rats. By W. FELDBERG and P. N. SAXENA 601

The mode of activation of pyramidal tract cells by intracortical stimuli. By ELŻBIETA JANKOWSKA, YVES PADEL and REISAKU TANAKA 617

Projections of pyramidal tract cells to α-motoneurones innervating hind-limb muscles in the monkey. By ELŻBIETA JANKOWSKA, YVES PADEL and REISAKU TANAKA 637

The effect of ouabain on ion transport across isolated sheep rumen epithelium. By F. A. HARRISON, R. D. KEYNES, J. C. RANKIN and L. ZURICH 669

Characterization of acetylcholine receptors in the Schwann cell membrane of the squid nerve fibre. By JORGE VILLEGAS . . 679

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

SUBJECT INDEX

Acetycholine, the effect of procaine on the action of – at the neuromuscular junction (frog), **249,** 269

Acetylcholine receptors, characterization of – in the Schwann cell membrane of the squid nerve fibre, **249,** 679

Action potential, calcium and sodium ions as charge carriers in the action potential of an identified snail neurone, **249,** 241

the heat production associated with the passage of a single impulse in pike olfactory nerve fibres, **249,** 349

Active transport, the interaction of adenosinetriphosphate and inorganic phosphate with the sodium pump in red cells (human), **249,** 51

extracellular potassium changes in the spinal cord of the cat and relation to slow potentials, – and impulse transmission, **249,** 167

Adenosine triphosphate, the interaction of – and inorganic phosphate with the sodium pump in red cells (human), **249,** 51

Anaesthetics, comparative study of the effects of propranolol and tetracaine on cation movements in resealed human red cell ghosts, **249,** 27

Atrial receptors, – and heart rate: the efferent pathway (dog), **249,** 581

Axoplasm, calcium uptake by – extruded from giant axons of *Loligo*, **249,** 37*P*

Binocular vision, the relation between discrimination and sensitivity in the perception of motion in depth (man), **249,** 387

Body temperature, prostaglandins, endotoxin and lipid A on – in rats, **249,** 601

Burn injury, aerobiological investigations in a new Regional Burns Unit, **249,** 4*P*

Calcium binding, calcium uptake by axoplasm extruded from giant axons of *Loligo*, **249,** 37*P*

Calcium current, voltage-clamp studies of the calcium inward current in an identified snail neurone: comparison with the sodium inward current, **249,** 253

Calcium ion, calcium and sodium ions as charge carriers in the action potential of an identified snail neurone, **249,** 241

Calcium release, contractions induced by a calcium-triggered release of calcium from the sarcoplasmic reticulum of single skinned cardiac cells (rat), **249,** 469

Cardiac cells, contractions induced by a calcium-triggered release of calcium from the sarcoplasmic reticulum of single-skinned – (rat), **249,** 469

effects of magnesium on contractile activation of skinned cardiac cells, **249,** 497

Cation movements, comparative study of the effects of propranolol and tetracaine on cation movements in resealed human red cell ghosts, **249,** 27

Cerebellar cortex, the differential effect of cooling on responses of – (cat), **249,** 119

Cerebellum, connexions between the – and the reticular formation in the dogfish *Scyliorhinus canicula*, **249,** 62*P*

Circulation, temperature dependence of the – pattern in the upper extremities (man), **249,** 197

Cochlear, the – nerve: recording with micro-electrodes (film), **249,** 6*P*

Cold exposure, is brain prostaglandin synthesis involved in response to cold? (cat), **249,** 425

Colon, transport of electrolytes across the helicoidal – of the new-born pig, **249,** 103

Cortical stimuli, the mode of activation of pyramidal tract cells by intra – (monkey, cat), **249,** 617

Deuterium oxide, transport of – across isolated rat small intestine, **249,** 591

Development, the – of functional innervation in the hind limb of the chick embryo, **249,** 301

Electrolytes, transport of – across the helicoidal colon of the new-born pig, **249,** 103

Electromyogram, rate of flow of digesta and electrical activity of the small intestine in dogs and sheep, **249,** 69

Embryo, the development of functional innervation in the hind limb of the chick –, **249,** 301

Endotoxin, prostaglandins, – and lipid A on body temperature in rats, **249,** 601

End-plate current, the amplitude and the time course of the – at various pH levels in the frog sartorius muscle **249,** 183

Ergometer, bicycle – with direct readout of torque, speed and power, **249,** 18*P*

Erythrocyte ghosts, comparative study of the effects of propranolol and tetracaine on cation movements in resealed human red cell ghosts, **249,** 27

Erythrocytes, the interaction of adenosine triphosphate and inorganic phosphate with the sodium pump in red cells (human), **249,** 51

Excitation-contraction coupling, relations between membrane potential, sodium currents and contraction in frog twitch muscle fibres, **249,** 26*P*

Eye movements, depression in the excitability of relay cells of lateral geniculate nucleus following saccadic – in the cat, **249,** 87

Fusimotor neurones, the post-stimulus histogram as an analogue of post-synaptic potential in –, **249,** 11*P*

Giant nerve fibre, characterization of acetylcholine receptors in the Schwann cell membrane of the squid nerve fibre, **249,** 679

Glucagon, release of amino acids from the muscles of normal and fasted rabbits following injection of – , **249,** 48*P*

Glycine, excitation of frog spinal motoneurones by –, **249,** 67*P*

Hand, temperature dependence of the circulation pattern in the upper extremities (man), **249,** 197

Heart, the influence of extracellular potassium ions on the action of ouabain on membrane currents in sheep Purkinje fibres, **249,** 42*P*

transient inward current underlying strophanthidin's enhancement of pacemaker activity in Purkinje fibres (calf), **249,** 40*P*

Heart rate, atrial receptors and –: the efferent pathway (dog), **249,** 581

Heat production, the – associated with the passage of a single impulse in pike olfactory nerve fibres, **249,** 349

Hippocampus, influences of the septum on the hippocampal dentate area which are unaccompanied by field potentials (rat), **249,** 14*P*

propagation of action potentials into the dendrites of hippocampal granule cells *in vitro* (guinea-pig), **249,** 16*P*

Histamine receptors, effects of histamine, 2-methylhistamine and 4-methyl-histamine on blood pressure and vascular resistance in the cat, **249,** 31*P*

Hormone release, – in relation to inactivation of Ca-entry in the rat neurohypophysis, **249,** 38*P*

Hyperaemia, functional – in soleus muscle of the cat, **249,** 20*P*

Innervation, the development of functional – in the hind limb of the chick embryo, **249,** 301

Intestinal transport, accumulation of D-galactose at the serosal border of rabbit ileum: the effects of theophylline, **249,** 49*P*

Intracellular pH, – and distribution of weak acids across cell membranes. A study of D- and L-lactate and of DMO in rat diaphragm, **249,** 1

Intraventricular haemorrhage, an experimental model of perinatal –, **249,** 12*P*

Ion transport, the effect of ouabain on – across isolated sheep rumen epithelium, **249,** 669

Kidney, the effect of glucose on fluid reabsorption in rat renal proximal convoluted tubules, **249,** 44*P*

a note on the split-droplet technique as applied to proximal tubules of the rat kidney, **249,** 45*P*

Lactate, intracellular pH and distribution of weak acids across cell membranes. A study of D- and L-lactate and of DMO in rat diaphragm, **249,** 1

Lateral geniculate nucleus, depression in the excitability of relay cells of – following saccadic eye movements in the cat, **249,** 87

Limb muscles, projections of pyramidal tract cells to α-motoneurones innervating hind-limb muscles in the monkey, **249,** 637

Lipid, prostaglandins, endotoxin and lipid A on body temperature in rats, **249,** 601

Lung, evidence concerning the site of receptors mediating the Hering-Breuer inflation reflex (rabbit), **249,** 30*P*

Lung mechanics, bronchial hysteresis in excised lungs (dog), **249,** 435

Magnesium, effects of – on contractile activation of skinned cardiac cells, **249,** 497

Menstrual cycle, variation in plasma ACTH levels during the human –, **249,** 36*P*

Molecular probes, quantification of inert isotopic – in tissues, **249,** 9*P*

Molluscan neurones, potassium activation in *Helix aspersa* neurones under voltage clamp: a component mediated by calcium influx, **249,** 211

calcium and sodium ions as charge carriers in the action potential of an identified snail neurone, **249,** 241

voltage-clamp studies of the calcium inward current in an identified snail neurone: comparison with the sodium inward current, **249,** 253

Motoneurones, projections of pyramidal tract cells to α-motoneurones innervating hind-limb muscles in the monkey, **249,** 637

Movement detection, the velocity tuning of single units in cat striate cortex, **249,** 445

pattern and flicker detection analysed by subthreshold summation, **249,** 519

Movement detectors, the relation between discrimination and sensitivity in the perception of motion in depth (man), **249,** 387

Muscle, intracellular pH and distribution of weak acids across cell membranes. A study of D- and L-lactate and of DMO in rat diaphragm, **249,** 1

Muscle spindle, the sensitivity of chronically de-efferented – to acetylcholine (rat), **249,** 52*P*

skeleto-fusimotor axons in hind-limb muscles of the cat, **249,** 153

the response to stretch of human intercostal – studied *in vitro* **249,** 561

Myelinated nerve fibres, effects of ionic concentration on sodium permeability properties of – of *Xenopus laevis*, **249,** 549

Neuromuscular junction, the effect of procaine on the action of acetylcholine at the – (frog), **249,** 269

Neuromuscular transmission, the ionic permeability changes caused by the excitatory transmitter at the insect neuromuscular junction, **249,** 24*P*

Neurones, direction specificity in cortical responses to moving stimuli – a simple model, **249,** 7*P*

synaptic potentials recorded from – of the submucous plexus of guinea-pig small intestine, **249,** 369

New-born, transport of electrolytes across the helicoidal colon of the – pig, **249,** 103

Non-myelinated nerve, – X-ray scattering patterns (crab), **249,** 21*P*

the movement of potassium ions during electrical activity and the kinetics of the recovery process, in the garfish olfactory nerve, **249,** 327

Olfactory nerve, the movement of potassium ions during electrical activity, and the kinetics of the recovery process, in the non-myelinated fibres of the garfish –, **249,** 327

the heat production associated with the passage of a single impulse in pike – fibres, **249,** 349

Ouabain, transient inward current underlying strophanthidin's enhancement of pace-maker activity in Purkinje fibres (calf), **249,** 40*P*

the influence of extracellular potassium ions on the action of – on membrane currents in sheep Purkinje fibres, **249,** 42*P*

the effect of – on ion transport across isolated sheep rumen epithelium, **249,** 669

pH, the amplitude and the time course of the end-plate current at various – levels in the frog sartorius muscle, **249,** 183

Post-synaptic membrane, the effect of temperature on desensitization kinetics at the – of the frog muscle fibre, **249,** 285

Potassium activation, – in *Helix aspersa* neurones under voltage clamp: a component mediated by calcium influx, **249,** 211

Potassium activity, changes in – within frog sartorius muscle fibres during sodium enrichment in potasium-free Ringer's fluid, **249,** 25*P*

Potassium concentration, extracellular potassium changes in the spinal cord of the cat and relation to slow potentials, active transport and impulse trasmission, **249,** 167

Potassium fluxes, the movement of potassium ions during electrical activity, and the kinetics of the recovery process, in the non-myelinated fibres of the garfish olfactory nerve, **249,** 327

Potentials, extracellular potassium changes in the spinal cord of the cat and relation to slow – , active transport and impulse transmission, **249,** 167

Procaine, the effect of – on the action of acetylcholine at the neuromuscular junction (frog), **249,** 269

Prostaglandin, Is brain – synthesis involved in responses to cold? (cat), **249,** 425

–, endotoxin and lipid A on body temperature in rats, **249,** 601

Puberty, modulation by oestrogen of the rate of precocious sexual maturation in female rats induced by brain stimulation, **249,** 35*P*

Pyramidal tract, the mode of activation of – cells by intra cortical stimuli (monkey, cat), **249,** 617

Pyramidal tract cells, projections of – to α-motoneurones innervating hind-limb muscles in the monkey, **249,** 637

Renin, cardiovascular responses and – release during stimulation of afferent renal nerves in the cat, **249,** 46*P*

Rumen epithelium, the effect of ouabain on ion transport across isolated sheep –, **249,** 669

Sarcoplasmic reticulum, contractions induced by a calcium-triggered release of calcium from the – of single skinned cardiac cells (rat), **249,** 469

Schwann cell, characterization of acetylcholine receptors in the – membrane of the squid nerve fibre, **249,** 679

Septum, influences of the – on the hippocampal dentate area which are unaccompanied by field potentials (rabbit), **249,** 14*P*

Skeleto-fusimotor axons, – in hind-limb muscle of the cat, **249,** 153

Small intestine, rate of flow of digesta and electrical activity of the small intestine in dogs and sheep, **249,** 69

synaptic potentials recorded from neurones of the submucous plexus of guinea-pig –, **249,** 369

transport of deuterium oxide across isolated rat –, **249,** 591

Smooth muscle, hypertrophy of a – (rat, guinea-pig), **249,** 1*P*

the sphincter pupillae: contractions in Ca^{2+}-free solution (guinea-pig), **249,** 28*P*

rectification in the – cell membrane of the rabbit aorta, **249,** 29*P*

Sodium channel, slow recovery of the inactivation of sodium conductance in *Myxicola* giant axons, **249,** 22*P*

Sodium permeability, effects of ionic concentration on – properties of myelinated nerve fibres of *Xenopus laevis*, **249,** 549

Sodium pump, the interaction of adenosine-triphosphate and inorganic phosphate with the sodium pump in red cells (human), **249,** 51

Spinal cord, extracellular potassium changes in the – of the cat and relation to slow-potentials, active transport and impulse transmission, **249,** 167

Spinocervical tract, the cells of origin of the cat – (cat), **249,** 65*P*

Statocysts, the – of various cephalopods, **249,** 1*P*

receptors in the – of squids, **249,** 59*P*

Stretch, the response to – of human intercostal muscle spindles studied *in vitro* **249,** 561

Substantia nigra, the effect of cholinergic and anticholinergic drugs on rotational behaviour in mice with destruction of one nigrostriatal pathway, **249,** 64*P*

Sympathetic ganglia, the effects of axotomy and nerve growth factor on the neuronal population of the superior cervical ganglion of the mouse, **249,** 61*P*

Sympathetic nerves, the influence of hypercapnia and hypoxia on the activity recorded from intestinal – in the rabbit with cut sinus nerves, **249,** 68*P*

Synaptic potentials, – recorded from neurones of the submucous plexus of guinea-pig small intestine, **249,** 369

Temperature, the differential effect of cooling on responses of cerebellar cortex (cat), **249,** 119

– dependence of the circulation pattern in the upper extremities (man), **249,** 197

the effect of – on desensitization kinetics at the post-synaptic membrane of the frog muscle fibre, **249,** 285

Tendon organs, the dynamic responses of Golgi tendon organs (cat), **249,** 53*P*

Thermoregulation, the effect of warming and cooling the hypothalamus, or intra-carotid injections of cold saline, on thermoregulation behaviour in sheep, **249,** 33*P*

cyclic adenosine 3′-5′-monophosphate (cAMP) and body temperature, **249,** 34*P*

Thermoregulatory behaviour, the effects of intra-ruminal loading with cold water on – in sheep, **249,** 139

Transport, – of electrolytes across the helicoidal colon of the new-born pig, **249,** 103

Vascular resistance, effects of histamine, 2-methylhistamine and 4-methylhistamine on blood pressure and – in the cat, **249,** 31*P*

Ventrobasal thalamus, an analysis of the representation of the forelimb in the ventrobasal thalamic complex of the albino rat, **249,** 399

Vibration reflex, facilitation of the tonic – in the spinal cat by 5-hydroxytryptophan (5-HTP), **249,** 54*P*

Vision, pattern and flicker detection analysed by subthreshold summation, **249,** 519

Visual cortex, on the response linearity of neurones in cat visual cortex, **249,** 56*P*

the velocity tuning of single units, in cat striate cortex, **249,** 445

Visual evoked potentials, properties of individual components of pattern-onset evoked potentials in man, **249,** 57*P*

Voltage clamp, potassium activation in *Helix aspersa* neurones under voltage clamp: a component mediated by calcium influx, **249,** 211

– studies of the calcium inward current in an identified snail neurone: comparison with the sodium inward current, **249,** 253

effects of ionic concentration on sodium permeability properties of myelinated nerve fibres of *Xenopus laevis*, **249,** 549
